I am a dedicated student currently pursuing a degree in Management Information Systems. Embarking on my first-ever internship/proper work experience, I am eager to combine my academic knowledge with practical experiences to contribute effectively to the dynamic world of information systems and financial technology. My journey into Management Information Systems has been fueled by a deep-seated curiosity about the intersection of technology and business. While I am still discovering the full extent of my capabilities, I am confident in my ability to adapt, learn quickly, and collaborate effectively.

EDUCATION

- COVENANT UNIVERSITY   **Ota,Ogun State**

Management Information System

Current Level: 400

Current CGPA: 4.10/5.0

- REDEEMERS INTL. SCHOOL   **Ikeja,Lagos State**

Secondary School

PERSONAL PROJECTS

1.) MEDICATION REMINDER

I crafted a mobile app dedicated to empowering users in managing their medication schedules. By employing HTML, CSS, JS, and MongoDB, the app ensures seamless interaction and data storage. Leveraging Windows API Push notifications, users receive timely reminders, eliminating the risk of missing any medication doses.

2.) ACCESS MANAGEMENT PORTAL

I developed an intuitive sign-in/sign-up system with real-life validation, leveraging HTML, CSS, and JS. The user profiles are securely stored in a MongoDB database, ensuring data integrity. Before successful login, the system verifies user existence in the database, seamlessly integrating these technologies for a streamlined authentication experience.

3.) PORTFOLIO WEB APPLICATION

I engineered a captivating portfolio web application utilizing HTML, CSS, and JavaScript to showcase my professional endeavors and skills. This interactive platform offers visitors a comprehensive overview of my projects, expertise, and contact information in a visually appealing and user-friendly interface. Through seamless integration of HTML, CSS, and JavaScript functionalities, users can navigate effortlessly through different sections, explore showcased projects, and connect with me effectively.

4.) QUIZ APPLICATION

I designed a vibrant Nigerian quiz app to commemorate Independence Day, featuring an engaging timer for added excitement. Developed using MySQL and C# Windows Forms, the app seamlessly integrates with the MySQL database to store questions, options, and answers.

5.) NEWS APPLICATION

I crafted a dynamic financial news application using HTML, CSS, and JavaScript, seamlessly integrating a news API to display the latest financial and current news updates. The user-friendly interface provides easy navigation and access to an excess of news articles from diverse sources.

6.) WEATHER APPLICATION

I developed an interactive weather application leveraging HTML, CSS, and JavaScript to provide users with up-to-date weather information. By integrating a weather API, the application fetches and displays current weather conditions, temperature, and other relevant details in a visually appealing manner. Users can easily navigate through the interface, accessing comprehensive weather forecasts from various sources with ease.

WORK EXPERIENCE

1.) COURSE REPRESENTATIVE|COVENANT UNIVERSITY| NOV 2021 - FEB 2023

-I engaged with peers and gathered feedback on various aspects of our educational experience, including modules, assessments, resources, and other relevant areas.

-I represented the student voice at Student meetings and other relevant forums.

-I worked collaboratively with the School management to ensure effective communication of decisions made at meetings to the student body in my course.

-I understood and represented my peers' educational interests, including matters related to teaching, learning opportunities, assessment and feedback, and academic support.

-I maintained records of student feedback and ensured it was effectively communicated to relevant stakeholders.

-I submitted assignments promptly and efficiently to meet course requirements.

-I ensured that the exam table and arrangements were conducive to the needs and standards of our course.

2.) GRAPHICS TEAM|OLIVE MEDIA|COVENANT UNIVERSITY| APRIL 2022- PRESENT

-Coordinated the collection of Bible verses from the chaplain before services commenced promptly at 5:30 for CHOP services Sunday and Thursday Services.

-Meticulously transcribed prayers, announcements, and other pertinent information during services, ensuring error-free typing for seamless display to congregants.

-Acted with attentiveness to swiftly display Bible verses as announced by the chaplain during services.

-Provided seamless display of song lyrics to congregants as they sang during worship sessions.

-Designed aesthetically pleasing song covers for the choir, enhancing the visual appeal of their musical presentations.
